

FRONT END DEVELOPER

at Clintworld GmbH

Clintworld is an owner-managed software company based in Bönningstedt near Hamburg. The focus is on international sales and the further development of the self-developed tariff and simulation software **Clintview**. The target group are network operators and resellers in the telecommunications sector. Project teams integrate this software into the customer's systems as part of implementation projects and, together with the customer, specify additional web applications that allow simple and use-case-centered access to the Clintview functionality.

As **Front End Developer**, you will become part of our development team and be jointly responsible for implementing a new UI/UX for our software Clintview and, additionally, support our project teams with customer-specific developments.

Job Duties & Responsibilities

- Implement a new front end for our software Clintview in a modern software environment
- Critique and improve upon existing design (when needed)
- Team-up for specifications and development projects
- Create relevant documentation
- Test new releases

What You Bring

- BS or MS in Informatics/Computer Science or something similar
- Experience in working with modern JavaScript UI frameworks such as React or Vue
- Familiarity with Java & Python
- Willingness to take up some back end development (if necessary)
- Very good language skills in German and English or in German and French

Location/Remote Opportunities

We have a beautiful office in Bönningstedt (near Hamburg), along with a share of remote employees.

Permanently remote applicants will be considered, but we'll give priority to local applicants.

What You Receive

- A full-time position with flexible working hours and 30 vacation days.
- A great compensation package (fixed salary with individual bonus agreement).
- A varied job and exciting project opportunities.
- A competent, friendly team.
- Great flexibility and room for creativity.
- Part time home office model.
